# ORGANIZE Your Closet!

Whip your wardrobe into shape with advice and recs from the pros

## Get started!

### 1. Analyze your closet

Take 30 minutes to write down what you think isn't working, says Julie Morgenstern, a N.Y.C.-based organizer. Do you need more shelving? More hanging space? This will help you shop for storage solutions.

### 2. Create a system

Pick one that works for your lifestyle, says Lisa Adams, an L.A.-based organizer. Try organizing your clothes into work, casual and dressy categories. You can break it down further by color and type of piece.

### 3. Sort thoroughly

Pull out every item, says Morgenstern, and decide whether it will stay or go. Store out-of-season items in a hanging garment bag or storage box, says stylist George Kotsiopoulos.

### 4. Maintain order

Put things away every night, says Adams. If you work organization into your routine, it'll become second nature instead of a chore!

### Use drawer dividers!

They're perfect for lingerie, socks, tights, scarves and belts.
